about us

We are a team of climbers based in Christchurch, New Zealand. We make holds inspired by the natural beauty of our country.

At Climb Craft we push the boundaries of hold design with a hands-on approach guided by innovation, passion and attention to detail.

We understand what climbers want and design our holds with climbers in mind.

our macros

We have drawn inspiration for the design of our macros from the natural curvilinear forms of the Castle Hill Basin boulders—one of the world's premiere bouldering areas, and our local climbing spot.

Clean, modern lines complement subtle detailing of textured areas—supporting modern climbing movement.

Our macros are constructed from high-strength GRP with reinforced screw inserts and high-abrasion composite textured surface finish, giving perfect grip.

All macros are available in dual-tex or fully textured.
