CATALOGUE 2026

Spirit of Mouvement

Agripp first holds were made more than 30 years ago by Philippe Ceulemans, one of the first route-setter and shaper from Belgium.

Agripp is constantly growing and innovating and is now offering the full range of high-level climbing holds products (holds, macros, woods) worldwide.

Both at the Olympic Games and the World Cup, our products are also in thousands of climbing gyms.

We produce holds in PE and in PU Dannomond which has high gloss.

PASSION OF HOLDS DESIGN

Our three commitments

1. Quality and premium finish

We commit to offering high-end products (quality, finish, and durability).

2. Guaranteed satisfaction

If you are not satisfied with your purchase, you can return the grips to us, and we will refund you in full, without hassle or complex procedures.

3. Competitive delivery times

We strive to deliver faster than our competitors thanks to local production and stocks that we pre-finance.

IN TOTAL TRANSPARENCY, HERE ARE OUR PARTNERS MANUFACTURING

Because we value transparency and believe our customers have the right to know where their products come from, here are our partner factories:

- **Europe:** Composite-X, Escape
- **America :** Proxy climbing, Binary holds
- **Asia :** Kastline

Sustainability

Agripp is also a committed brand, aware of its environmental impact. To reduce our carbon footprint, we have optimized our production by increasing the number of models produced by each partner factory. Therefore, European orders are produced in Europe, those from Asia and Oceania in Asia, and those from the Americas in the United States and Canada, significantly reducing transportation costs and delivery times. In an ongoing effort

to reduce our to reduce our impact, we are currently collaborating with two factories on pilot projects to produce macros from recycled plastic, while maintaining the superior quality that characterizes our products.
