SUP'R – Where shapes create experience

A climbing hold is never just an object. It is the beginning of an experience.

Every move starts with an intention.

For route setters, every shape is an idea, every texture an invitation.

At SUP'R, this is what we design for — tools that unlock creativity and elevate the climbing experience.

SUP'R is a brand born on the wall.

Created by setters, built for setters, and crafted for climbers who live every problem as a moment filled with emotion, challenge, and flow.

Climbing has given me everything. World Cup victories, travel, friendships, and more importantly, a way to learn, grow, and build myself. At some point, I knew I wanted to give back. To transform what this sport taught me into something tangible. To create products that inspire the next generation of movement.

Thibault is the artist. He sees lines where others see raw foam. He shapes with precision, patience, and a deep sense of purpose.

Together, we merged two worlds: high-level performance and expressive design. This is SUP'R. A brand driven by passion, guided by experience, and built to empower. Because holds are not just holds. They are possibilities. Emotions waiting to happen.

SUP'R — For inspired setters.

# MACROS PACKS

All our macros fiberglass are available in full and dual texture.

**WORLD CLIMBING**  
GOLD  
RECOGNISED HOLDS

Our macros packs  
**Discover 18**

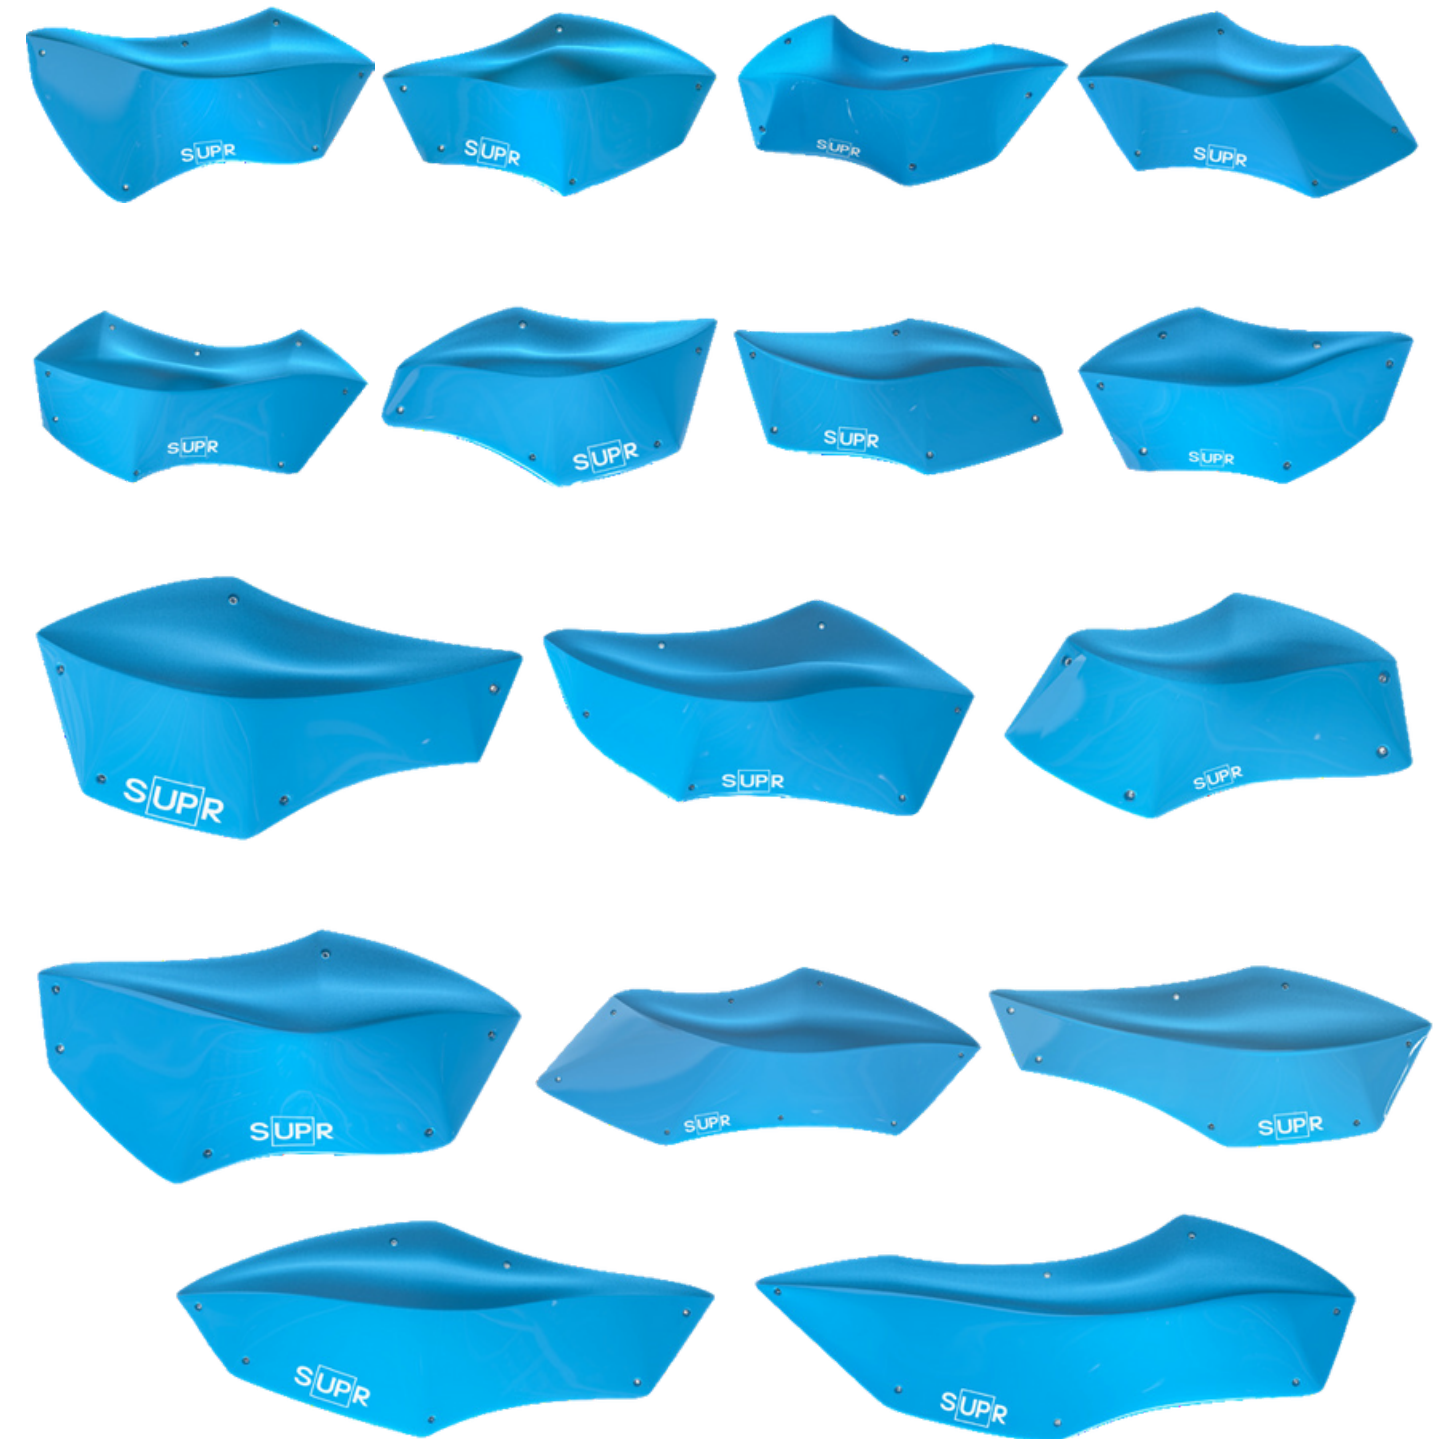

Our Discover pack comprises 18 volumes in a variety of grips and styles, offering the versatility to create boulders of any type. Medium-sized by design, they integrate seamlessly into routes and on wooden volumes.

Our macros packs  
**Fighters 16**

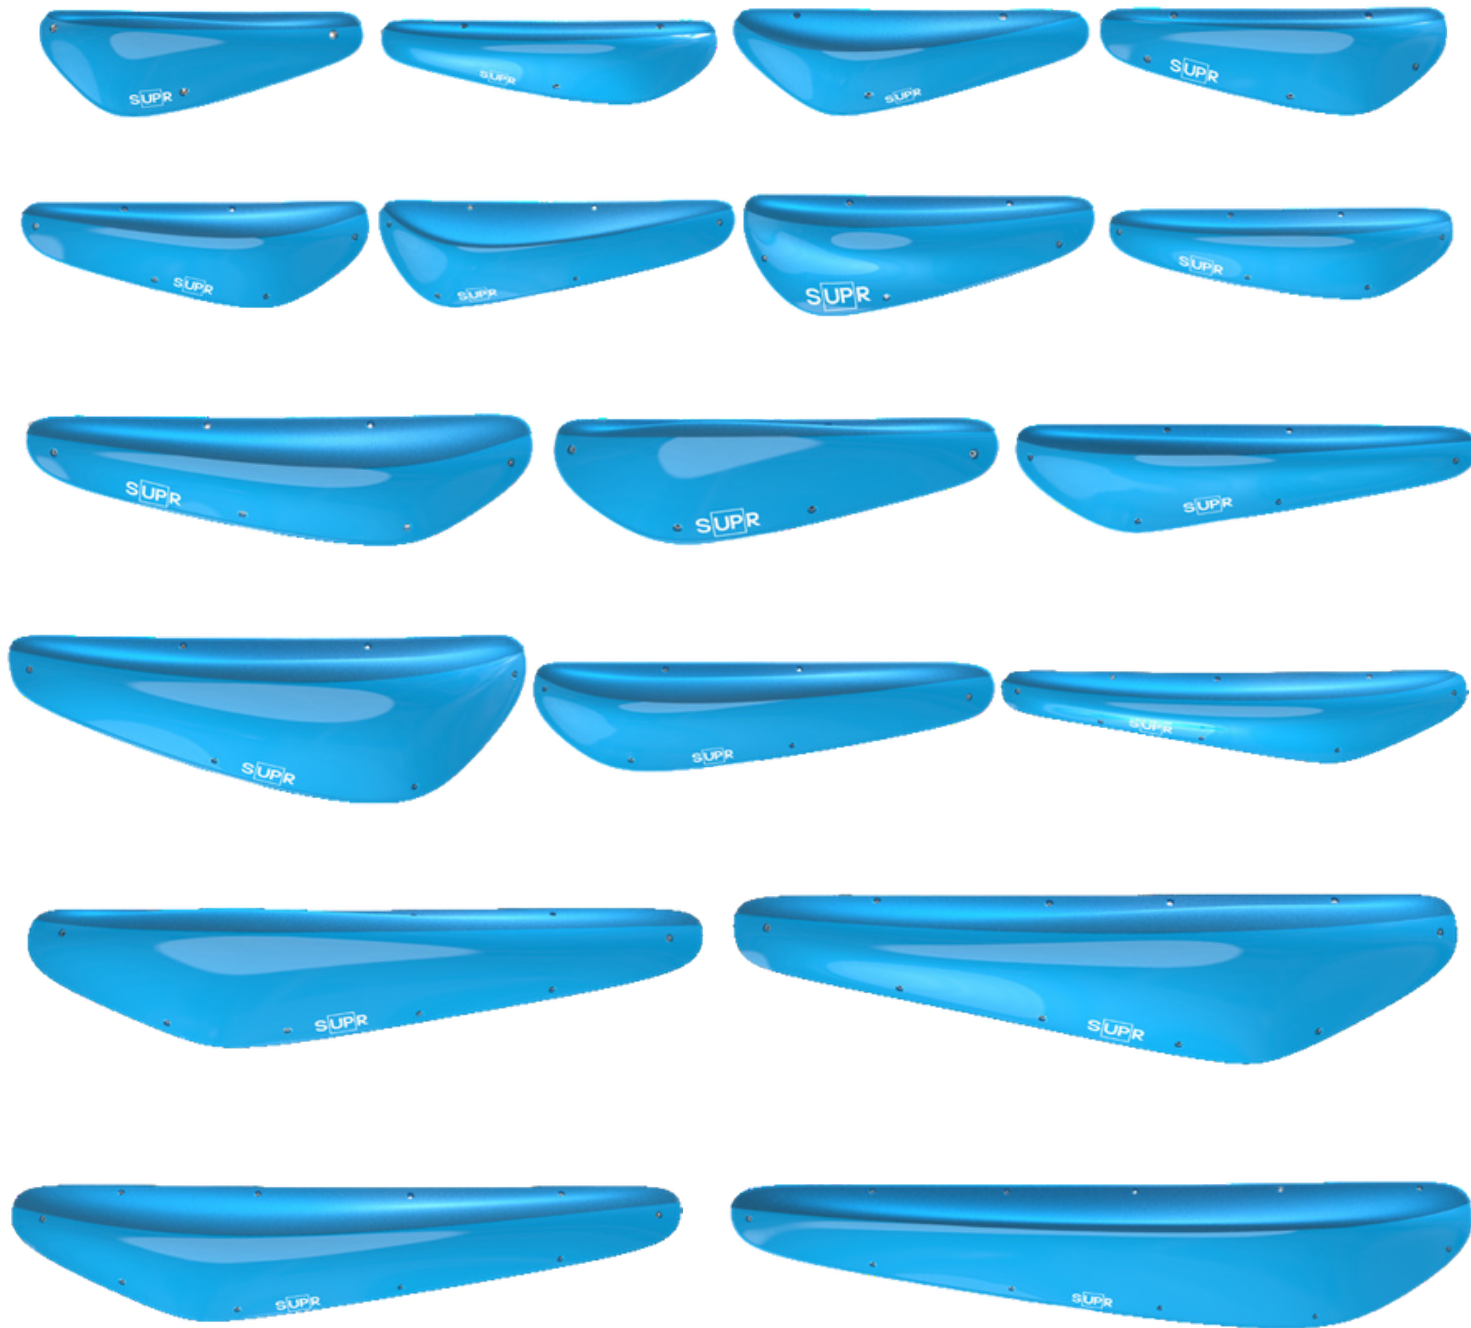

This set features 16 compact macros with defined profiles and dynamic, directional shapes. Engineered to spark powerful movement, they reward precision and promote full body tension. Ideal for dynamic boulders and strength-focused routes.

Available with a matching mini extension series to complete the range.

Our macros packs  
**Lances 18**

With 18 elongated macros featuring clean and linear lines, Lances combine sleek profiles with functional versatility. Perfect for compression, tension, and controlled movements, their slim profiles fit effortlessly into routes and macro stacks for modern, flow-oriented setting.

Our macros packs  
**Shields 19**

Our 2025 signature series, Shields include 19 rounded macros with precisely balanced geometry. This set blends jugs, edges, and slopers to support a wide range of movement styles, while soft transitions and generous shaping encourage fluid, confidence-driven climbing. Designed as a standout collection for modern boulder setting.

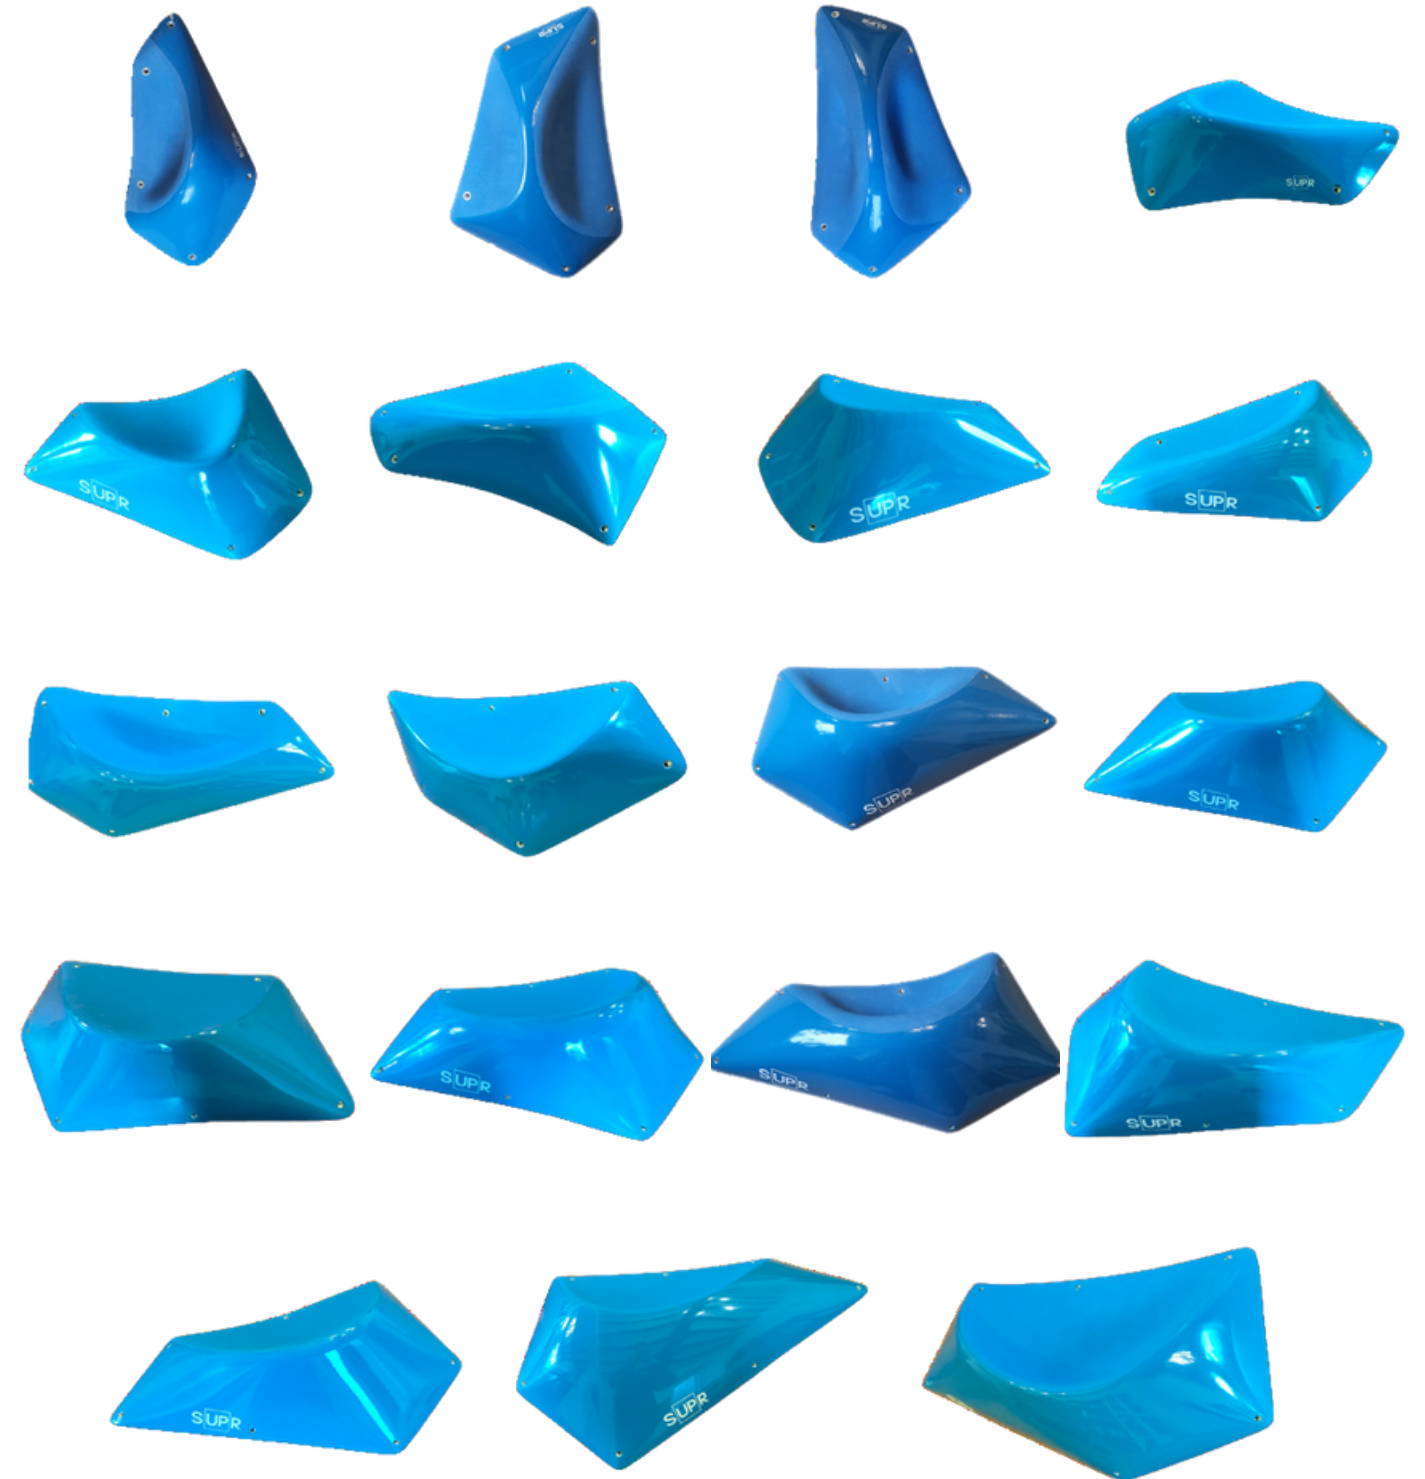

Our macros packs  
**Spaceships 12**

12 medium-sized macros with smooth, rounded features—perfect for open-handed grips and nuanced body positioning. Ideal as focal points or supporting elements, they suit a variety of climbing styles and wall angles.

Our macros packs  
**Eclipse 19**

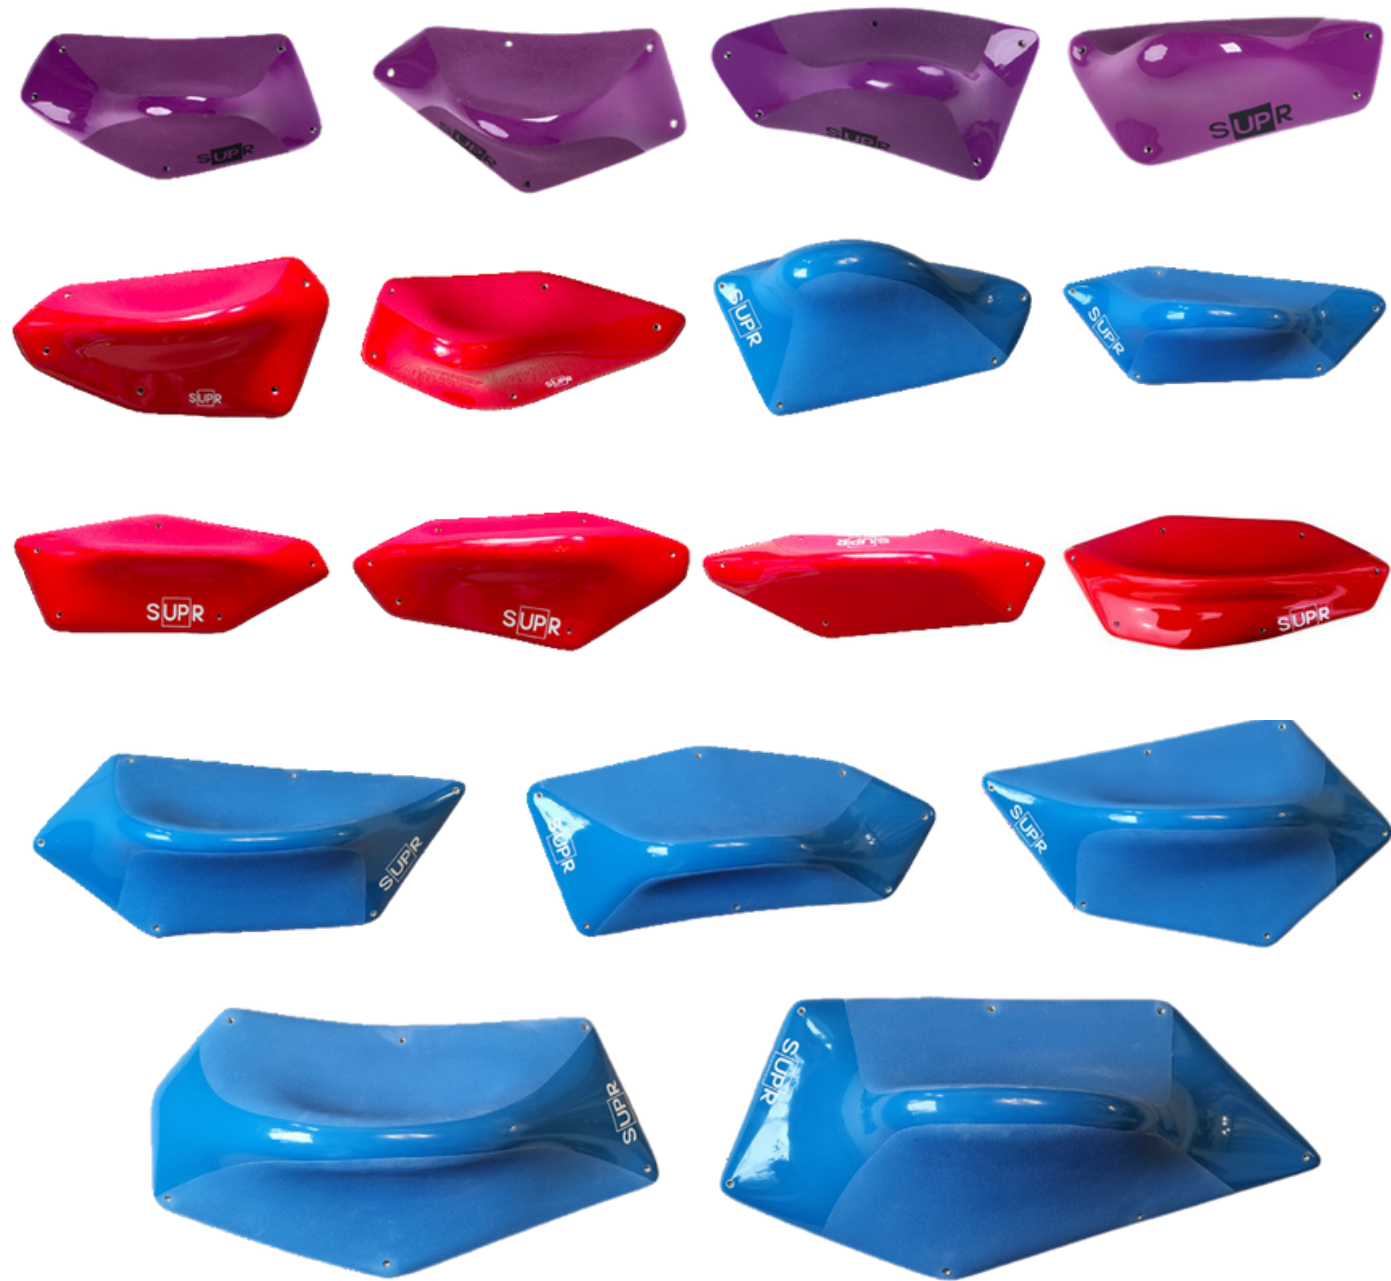

The Eclipse set comprises 19 macros, varying in size and grip, perfect for crafting boulders across all styles and levels. Their unique geometric forms stand in striking contrast to the curved grips, creating both visual impact and climbing challenge.

Our macros packs

## Cruisers 17

Cruisers features 17 compact pinch macros with reduced width and controlled depth, specifically designed to fill a gap in the market. These pinches stay effective for smaller hands, making the set accessible without compromising movement quality. Ideal for technical, precision-based boulders for all climbers.

Our macros packs

## Cumulus 19

Cumulus brings 19 macros with a cloud-inspired design, featuring soft, rounded forms and fluid geometry. Focused on slopers and enhanced with carefully chosen edges and jugs, this set encourages expressive movement and subtle body positioning.

**WORLD CLIMBING**

**PE - SHIELDS MINIS**

Complete the range with the matching Shields Minis extension series.

## NEBULA

Inspired by cosmic depths and textures, this special hand-made finish is produced exclusively on request, ensuring each piece is truly one-of-a-kind.

**WORLD CLIMBING**  
GOLD  
RECOGNISED HOLDS

# SHIELDS

Our Shields are defined by bold, rounded geometry that immediately command attention on the wall.

The series includes **19** macros—slopers, edges, and select jugs—delivering clear movement options and strong visual impact. With sizes ranging from 40 cm to 115 cm, the shapes make it easy to build boulders around a powerful central feature.

A crowd favorite in the Supr range, Shields naturally stand out in any setting.

## WHY SHIELDS?

Conceived as a statement piece, our Shields embodies strength, protection, and unmistakable form.

Originally released as a focused set of four, the concept proved so successful that it evolved into a complete 19-piece series, now complemented by matching PE jibs to complete the range.

PU- LANCES MINIS

Available with a matching mini extension series to complete the range.

# LANCES

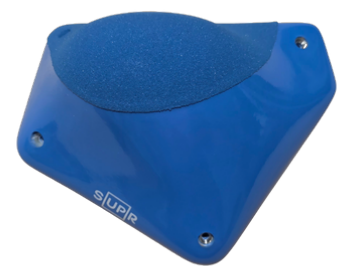

Our Lances consist of **18** elongated macro volumes defined by clean, directional geometry. The long profiles deliver a balanced mix of positive jugs, precise edges, and flat grip surfaces. Favored by IFSC setters, these shapes support clear movement intent across all wall angles. A versatile set tailored for both powerful and technical competition-style setting.

## WHY LANCES?

The series takes its name from the lance—long, focused, and purposeful. Like its namesake, each macro is designed to guide movement with precision and direction, carving clean lines through a boulder while remaining elegant and controlled.

# CUMULUS

Inspired by cloud formations, Cumulus features organic, flowing geometry.

The emphasis of the series is on rounded, flat slopers, and they are complemented by two edges and three jugs.

With a total of **19** shapes, the set strikes a balance between subtle movement and usability.

Originally released as a six-piece set, it was expanded to meet modern setting needs.

## WHY CUMULUS?

Cumulus is named after the soft, layered clouds hanging in the sky. Like its inspiration, the macros blend gentle forms with hidden complexity, encouraging fluid movement and nuanced body positioning.

# FIGHTERS

Fighters is a set of **16** macros defined by sharp silhouettes and aerodynamic profiles. Predominantly edgy in character, the series is complemented by select jugs to balance difficulty. These shapes demand precise body positioning, core tension, and full commitment on overhanging terrain. Designed for big, dynamic movement and modern competition-style climbing.

## WHY FIGHTERS?

Fighters draws inspiration from the form of a fighter jet—sleek, fast, and aggressive. Smooth, flowing curves merge with sharp edges, creating volumes that slice through space with speed and intent, just like the aircraft they are named after.

# CRUISERS

Cruisers consists of **17** compact pinch volumes designed with reduced width and controlled depth.

The shaping targets a gap in the market, offering pinches that remain effective for smaller hands.

This makes the set especially accessible without compromising movement quality.

Ideal for technical, precision-based boulders across a wide range of climbers.

## WHY CRUISERS?

Cruisers was named after the way these pinches move smoothly across the wall.

Designed to work on all angles, the shapes allow climbers to cruise along surfaces without interruption.

The compact profiles encourage continuous movement, turning pinches into a fluid, flowing experience.

# SPACESHIPS

Spaceships features **12** macros characterized by clean, smooth lines and generous shaping.

Primarily positive jugs, they perform exceptionally making on overhangs, while their refined geometry ensures seamless integration with any type of volume.

A versatile collection that fits naturally into both competition and commercial settings.

## WHY SPACESHIPS?

Inspired by futuristic spacecraft, Spaceships combines smooth, balanced forms with purposeful design.

Their flowing silhouettes are designed to land effortlessly on any surface, adapting to the wall like a vessel docking in space.

# Eclipse

The Eclipse series was Supr's first fiberglass macro series, and continues to be our most iconic. Comprising **19** volumes crafted for powerful, dynamic movement, its distinctive geometry has made it a frequent choice on World Cup stages. A proven collection for high-level competition and modern setting.

## WHY Eclipse?

The Eclipse range takes its name from the powerful moment when one force moves in front of another, capturing all eyes. On the wall, these volumes evoke the same effect—commanding presence, decisive movement, and moments that define a climb.

**WORLD CLIMBING**  
GOLD  
RECOGNISED HOLDS

# Proven Precision Performance

Precision shaping and refined surface textures deliver consistent performance for modern setting. These designs have been showcased at World Cup events, proving their quality at the highest level. At Supr, we embrace bold design, prioritizing originality over imitation. We don't follow trends or borrow ideas. We create our own universe, shaping movement, culture, and intent.
